Polar Bear Witness Response Sheet

After watching the documentary, answer the following questions:

- Briefly, what is the procedure that Rode and her colleagues use to collect data from wild polar bears?

- Look back at where you highlighted examples of data collection. Which examples involve direct evidence? Which examples involve proxy data, and what questions do these proxies address?

Direct Measurements	Indirect Measurements

Polar Bear Witness Response Sheet

- What are some of the questions that Rode hopes to answer?

- Do any of those questions address sea ice extent, and if so, how?

- What do you find interesting about how Rode and her team collected data?

- Could you see yourself traveling to these extremes to observe polar bears? Do you think you could do it for weeks or months at a time?
