Rock Inquiry Resources

**Rock and Mineral Identification Resources**
- The Collector's Corner
- Rocks Around the World
- Introduction to Rocks and Minerals App
- RockD
- Flyover Country App
- Sand Atlas
- Exploring Earth (dichotomous key with images):
  - Volcanic
  - Sedimentary
  - Metamorphic
- Rocks under the microscope

**Rocks In Everyday Life**
Collage of rocks and minerals and their uses
2016 Mineral Baby

**Interactive Geology Maps**
Easy: Flyover Country
Intermediate: One Geology
Intermediate: European Geological Data Infrastructure (interactive map with various layers):
Advanced: National Geologic Map Database

**Static Geology Maps**
The North America Tapestry of Time and Terrain
Surficial Materials in the Conterminous United States
Paleogeographic Maps

**Additional Resources**
Earth Science Week
AGI Geoscience in your State
The Roles of Aesthetic Experience in Elementary School Science
Science Friday Science Club: Rock Challenge

**Organizations and Geoscience Education Resources**
American Geosciences Institute
National Earth Science Teachers Association
National Association of Geoscience Teachers
Minerals Education Coalition
Credits:
These resources were assembled by the skilled and knowledgeable facilitators of the Science Friday “Rock Inquiry 101” Webinot, October 18th, 2017.

Our thanks to the facilitators of this discussion:

Aida Awad, National Association of Geoscience Teachers, Broward College
Alex Guth, Michigan Technological University
Cheryl Manning, National Earth Science Teachers’ Association
Ed Robeck, American Geosciences Institute
