$\qquad$ Fish Species $\qquad$ Fish Preferred Temperatures $\qquad$

## Shifting Fishes Simulation Activity Worksheet

## Instructions:

(1) Outline all of the cells (habitat) that your fish could occupy in 1980 based on temperature.
(2) Place your one fish in one of those cells, and record the year in the cell on the map
(3) Record in the table below:
a. latitude of the cell your one fish occupies
b. total amount of cells (habitat) you could occupy
c. whether it was Easy, OK, or Hard to find cells (habitat) to occupy
(4) After 20 years, find a new cell, which is a temperature habitat your fish could occupy, to move one step:
a. has to be next to your current cell, so either up/down OR right/left
b. you can go back to a previous cell
(5) Repeat Steps 2-4 for 2000, 2020, 2040, 2060, 2080, and 2100.
(6) Fill in all of the cells that you could occupy in 2100, based on temperature, with hash marks.

## Questions:

What temperatures were preferred by your fish? Colder Intermediate Warmer

Describe the range size of temperatures preferred by your fish.

$\qquad$ Fish Species $\qquad$ Fish Preferred Temperatures $\qquad$

| Year | Fish <br> Latitude <br> $\left({ }^{\circ} \mathrm{N}\right)$ | Total <br> Habitat (\# <br> Cells) | How easy* <br> was it to find <br> habitat? |
| :---: | :---: | :---: | :---: |
| 1980 |  |  |  |
| 2000 |  |  |  |
| 2020 |  |  |  |
| 2040 |  |  |  |
| 2060 |  |  |  |
| 2080 |  |  |  |
| 2100 |  |  |  |

*Ease of Finding Habitat:
Easy= >20 cells
OK= 10-20 cells
Hard= <10 cells

## Questions to Consider: Circle the appropriate response

| How did the distribution of your one fish <br> change with warming along the coast? | Move <br> North | Stay the <br> same | Move <br> South |
| :--- | :--- | :--- | :--- |
| How did total habitat suitable for your <br> fish species change with warming? | Increase | Stay the <br> same | Decrease |

## Check for Understanding:

Make a claim about the relationship between the distribution of your fish species and temperature over time.

What is your evidence from your simulation data and reasoning for your claim?
Plot the trends over time:
